Fleet Management and Vehicle Tracking

1. Are you satisfied with your current vehicle tracking system?
2. Are you paying too much?
3. Are your current tracking devices reliable and accurate?
4. Are you paying premium rates and face delay for customised requirements?
5. Are you using a SMS-based solution and looking for a more advanced system?
6. Are you getting adequate and timely support from your current supplier?
7. Are you locked into the suppliers' propriety hardware and / or software?

If the answer is **Yes** to any of these questions then contact us at info@peksolutions.com or +233 2095791224 or visit our website at www.peksolutions.com to see how we can help you to reduce your costs and increase your profit and operational efficiency by best use of telematics technology.

Progress Update

In March 2013, we enhanced our online Fleet Management / Vehicle Tracking software solution to support three more GSM / GPS tracking devices:

- i. TopShine (VT310N)
- ii. TZone (AVL09) and
- iii. Falcom GmbH (Mambo).

In the previous month, we integrated the new GPRS-enabled Tramigo T22 OEM

About Us

PEK Solutions is a systems integrator and has been supporting companies operating in challenging markets in West Africa for almost a decade. Multi-national corporations such as Coca Cola, 7UP and West African conglomerates such as Dangote Group, AG Leventis (Nig) Plc, Nigerian Breweries PLC, Flour Mills, Buildwell, etc., have been using our advanced Fleet Management / Vehicle Tracking software to track over 5,000 vehicles simultaneously, on servers located in the UK.

We specialise in hosting customers' maps on our servers, integrating customers' tracking devices into our online software and developing complex reports to meet customers' specific requirements.
